

**You can't eat gold.
Gold doesn't earn any interest**

**True
False**

Forget everything that you've ever been told about what can be done with the physical ownership of gold. Conventional wisdom says, "Buy and hold!" Gold will be your "treasure chest." Right. Therein lies the problem!

We want to give this treasure chest wings—or more to the point, the treasure chest will become liquid by means of putting it in motion.

Do you know that it is possible to borrow Euros or Swiss Francs against your gold for less than 1%?

1.

Let's assume you want to finance a building project. For that purpose you will definitely not be able to secure a loan at 1% p.a. However, using your physical gold as collateral, it is totally possible! Understand that in

the financial world, gold is still considered the best collateral, regardless what your banker may tell you. And here's the best part: the gold you use remains outside the banking system in spite of the fact that it is being used as collateral for the loan!

Hence you can finance the building project—or whatever you like—much more economically than otherwise and bypass the banks!

A Penny Saved is a Penny Earned!

2.

You can use your gold as the basis for a low-interest loan business or investing in whatever you like and earning interest. You need only earn more than 1% to be on the plus side! Your imagination is the only limiting factor.

3.

You may think that when you make money in this enterprise, you then have to explain to the bank where the money came from, how it was earned, etc.

WRONG!

We don't need any banks for this.

For example:

You plan to lend money for specific projects at interest rates of 6% or 7% p.a.

We have a relationship with one of the most respected and qualified money managers south of the German border. There is no bank involved. He sets up whatever enterprise is under consideration better than a bank and independent of a bank. Everything is completely transparent. You are in direct contact with this money manager. There is no middle-man.

Rightly you may ask,

HOW CAN I GIVE MY GOLD WINGS?

Very important is that YOU ALWAYS HAVE OWNERSHIP OF YOUR GOLD!

Together with our partners, we issue to you precious metal certificates. These certificates are negotiable warehouse receipts. They are issued according to standards set forth by the Swiss Cantons of Zurich and Uri. There are also requirements regarding the actual storage of the precious metals, which must be stored in specific high security storage facilities in Switzerland and Hong Kong. Needless to say, everything is insured and then re-insured by Lloyds of London. The Swiss auditors BDO AG audit the stored metals semi-annually.

Nowhere in the world is your gold safer than in these storage facilities.

It is here that your gold must be stored in order to receive these certificates which can then be used as collateral.

You always remain the owner of the stored precious metal. Your precious metal bars (or Krugerrand coins) can even be segregated from other stored metals in the facility. In this circumstance, the certificates will be issued with the actual serial numbers of the bars on them. We guarantee the greatest discretion with regard to your information. We are, above all, not a bank.

With regard to the storage, we will help in any way necessary.

Your certificate of ownership will be issued immediately upon storage of your gold in the high security vault. You may also have your gold split up into separate parcels and have certificates issued for each, according to their purpose.

AND WHO IS GOING TO GUARANTEE ME AN INTEREST RATE UNDER 1% ON MY STORED GOLD?

Here is where we help you once again. For this purpose we go again to a country south of Germany. The lender will in any event be a state-regulated entity with whom we have developed a trusted working relationship.

IN SUMMARY:

1. You place your gold in one of the high-security storage vaults
2. For this gold—which is always under your ownership—you receive a negotiable warehouse receipt.
3. We assist you with the loan—you make the choice.
4. You do with the gold whatever you like.
